Material Facts

There are no other material facts about the securities being distributed that have not been disclosed in this Offering Document or in any other document filed by the Issuer in the 12 months preceding the date of this Offering Document.

Business Objectives and Milestones

What are the business objectives that we expect to accomplish using the available funds?

The Company intends to use the proceeds raised from the Offering for its general administrative (“G&A”) expenses for the next twelve months, general working capital purposes, and to expand the current drill program to 30,000 metres on the Company’s Dryden Gold Property in northwestern Ontario.

Any proceeds raised from the sale of CFT Shares and the FT Shares will be used to incur eligible resource exploration expenses which will qualify as (i) "Canadian exploration expenses" (as defined in the Tax Act), and (ii) as "flow-through mining expenditures" (as defined in subsection 127(9) of the Tax Act).

The net proceeds of the Offering are intended to meet the following near- and medium-term business objectives:

Business Objectives and Milestones	Target Completion Date	Projected Cost	
		Minimum Offering	Maximum Offering
Drilling & Exploration	6/01/2026	\$2,550,000	\$6,050,000
Corporate G& A	6/01/2026	\$500,000	\$500,000
Marketing	6/01/2026	\$450,000	\$450,000

PART 3 USE OF AVAILABLE FUNDS

What will our available funds be upon the closing of the Offering?

Based on the Company’s existing working capital as at June 30, 2025, of \$3,400,000, the Company’s expected availability of funds following closing of the Minimum Offering is \$6,900,000. The expected availability of funds from the Maximum Offering is \$10,400,000.

		Assuming the Minimum Offering	Assuming the Maximum Offering
A	Amount to be raised by this Offering	\$3,500,000	\$7,000,000
B	Selling commissions and fees	\$0	\$0

C	Estimated offering costs (e.g., legal, accounting, audit)	\$50,000	\$50,000
D	Net proceeds of offering: $D = A - (B+C)$	\$3,450,000	\$6,950,000
E	Working capital as at most recent month end:	\$3,400,000	\$3,400,000
F	Additional sources of funding	\$0	\$0
G	Total available funds: $G = D+E+F$	\$6,850,000	\$10,350,000

How will we use the available funds?

The Company intends to use the net proceeds from this Offering to expand the 2025 drill program on the Company's Dryden Gold Property in northwestern Ontario and for general working capital purposes:

Intended Use of Available Funds (listed in order of priority)	Assuming the Minimum Offering	Assuming the Maximum Offering
Drilling & Exploration	\$5,450,000	\$8,950,000
Corporate G&A	\$800,000	\$800,000
Marketing	\$600,000	\$600,000
Total:	\$6,850,000	\$10,350,000

The above noted allocation represents the Company's current intentions with respect to its use of proceeds based on current knowledge, planning and expectations of management of the Company. Although the Company intends to expend the proceeds from this Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company's ability to execute on its business plan and financing objectives.

The Company is an exploration stage company, and this involves a high degree of risk. The Company has not determined whether its mineral properties contain economically recoverable reserves of ore. The Company's primary source of funds comes from the issuance of share capital. The Company does not use other sources of financing that require fixed payments of interest and principal due to lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

The Company defines its capital as equity. Capital requirements are driven by the Company's exploration activities on its mineral properties. To effectively manage the Company's capital requirements, the Company has a planning and budgeting process in place to ensure that adequate funds are available to meet its strategic goals. The Company monitors actual expenses to budget on all exploration projects and overhead to manage costs, commitments, and exploration activities.

The Issuer's most recent unaudited interim financial statements for the period ended March 31, 2025, were prepared on a going-concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate equity financing in the future and repay its liabilities arising from normal business operations as they become due. These

material uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

How have we used the other funds we have raised in the past 12 months?

In the past 12 months the Company completed five financings for gross proceeds of \$8,620,599. There were no variances from the disclosure the Company previously made in the way the proceeds from this financing were used.
